# **Solid Waste Managed in Virginia During Calendar Year 2021**

## **EXECUTIVE SUMMARY**

Section 10.1-1413.1 of the Code of Virginia requires the Department of Environmental Quality (DEQ) to prepare a report by June 30 of each year describing the amount of solid waste disposed in the Commonwealth during the preceding calendar year. Facilities that have solid waste management permits are required to submit information to DEQ to prepare this report. As of May 13, 2022, 203 permitted facilities provided information on their activities for calendar year 2021 for this report. One permitted facility did not report for CY2021.

Based on the facilities' reports, a total of 22,730,851.70 tons of solid waste was received at Virginia's permitted solid waste management facilities during calendar year 2021. Of this total, 17,354,460.04 tons originated in the Commonwealth and 5,376,391.66 tons originated from other jurisdictions. The total amount of solid waste received increased by 1.00% or 225,524.95 tons compared to 2020.

Municipal solid waste (MSW) constituted 14,795,345.45 tons of the total amount of solid waste received during calendar year 2021. Of the total MSW received, 10,725,170.21 tons originated in the Commonwealth and 4,070,175.24 tons originated from other jurisdictions.

Five jurisdictions accounted for 97.45% of all waste received from out-of-state sources: Maryland (43.91%); New York (18.73%); New Jersey (14.34%); Washington, D.C. (14.04%); and North Carolina (6.34%).

During calendar year 2021, the total solid waste received from out-of-state decreased by 5.28%. MSW received from out-of-state decreased by 0.004% compared to 2020 amounts. Construction/demolition/debris (CDD) and industrial waste both decreased by 7.76% and 23.25% respectively compared to 2020 amounts. For waste originating in Virginia during the same period, the total solid waste and MSW received increased by 3.12% and 4.62% respectively compared to 2020 amounts. CDD waste increased by 1.05% and industrial waste received decreased by 12.00% compared to 2020.

Of the solid waste managed in Virginia during the year, 73.19% or 13,564,997.46 tons were landfilled onsite, 11.81% or 2,188,863.93 tons were incinerated onsite, and the rest was managed by other means (see Table 18). Of all solid waste received at Virginia facilities during the year, 65.09% was MSW, 19.10% was CDD waste, 4.94% was industrial waste and the remainder was other types of waste (see Table 19).

Permitted solid waste management facilities reported that 8.24% of the waste they managed was diverted from disposal by recycling or mulching; 1.05% of the total waste managed was composted.

At the option of the facility owner, Virginia Code § 10.1-1413.1 provides that the data collected may include an accounting of the facility's economic benefits to the locality where the facility is located. No facilities provided such information for calendar year 2021.

## I. Introduction

This report has been prepared in accordance with Virginia Code § 10.1-1413.1, which requires DEQ to prepare a report by June 30 of each year describing the amount of solid waste disposed of in the Commonwealth during the preceding calendar year. All permitted facilities (except for captive waste management facilities) that treat, store or dispose of solid waste are required to provide DEQ with information in their possession as is reasonably necessary for DEQ to prepare this report. The requirements for reporting are set forth in the Virginia Administrative Code, 9 VAC 20-81-80.

## II. Reporting Procedures

For each category of solid waste, permitted solid waste facilities in Virginia were asked to report the amount of waste that they received, the amount of waste mined<sup>1</sup>, the method by which the waste was managed, the jurisdiction where the waste originated, if known, and the facility's remaining capacity. A copy of the reporting table, DEQ Form 50-25, for providing information to DEQ is provided as Attachment 1.

The facilities identified amounts of solid waste by each of the following categories:

- municipal solid waste (MSW)
- construction/demolition/debris (CDD)
- industrial waste
- regulated medical waste (RMW)
- vegetative and yard waste (VW/YW)
- incineration ash
- sludge other than land applied in accordance with Virginia Code 62.1-44.19:3
- tires
- white goods (e.g., refrigerators, washing machines)
- friable asbestos
- petroleum-contaminated soil (PCS)
- other waste

The facilities also reported on each of the following methods of waste management:

- recycled onsite
- composted onsite
- landfilled onsite
- incinerated onsite
- sent offsite to be recycled
- sent offsite to be treated, stored or disposed
- stored onsite at the beginning of the reporting period
- stored onsite at the end of the reporting period
- mulched
- other

---

<sup>1</sup> Landfill mining is the excavation of previously landfilled materials.

Facilities submit this data online or by paper copy to the appropriate DEQ Regional Office. Facilities may log online at the Virginia Solid Waste Information and Assessment (SWIA) webpage to submit data at <https://www.deq.virginia.gov/our-programs/land-waste/solid-hazardous-waste/solid-waste/solid-waste-information-assessment>.

For the facilities that provided information, 2.96% (6 facilities) submitted paper copies and 97.04% (197 facilities) submitted the information online.

This report does not include the waste management activities from captive waste management facilities because they are statutorily exempt from the reporting requirements. A captive facility is one that is located on property owned or controlled by the generator of the waste. Most captive waste management facilities in Virginia are industrial landfills or regulated medical waste facilities. As a result, the reported amounts of industrial waste, regulated medical waste and sludge represent only the portion that is managed in off-site facilities. In addition, this report does not reflect tires managed under the Waste Tire Trust Fund at facilities that are not required to have a permit.

### **III. Receipt of Assessment Reports**

By regulation, facilities must submit their reportable data by March 31 each year. Facilities are required to submit a separate reporting table for each jurisdiction from which they received waste during the prior year. Information from reporting tables received on or before May 13, 2022, has been included in this report. For 2021, 203 permitted facilities reported their activities. These facilities submitted 343 separate reporting tables, representing waste received from 22 states and jurisdictions (including Virginia and Washington, D.C.). Last year, 201 facilities reported their activities for 2020.

### **IV. Discussion of Reported Waste Management Activities and Capacity Information**

Table 1 shows how the total solid waste received was managed by all facility types.<sup>2</sup> Table 2 lists the jurisdiction of origin of waste. Tables 3, 5, and 7 show how Municipal Solid Waste Sanitary Landfills, Construction/Demolition/Debris Landfills, and Industrial Landfills managed solid waste.<sup>3</sup>

Tables 9 – 17 show how other facility types (Incinerators, Transfer Stations, Material Recovery Facilities (MRF), Composters, and Regulated Medical Waste) managed the waste they received and a list of submitting facilities. Table 18 shows how the total waste stream was managed and Table 19 shows the composition of the total waste stream.

Permitted facilities that treat, store or dispose of solid waste are required to report the available capacity, expected life and current disposal rates. The reported remaining capacity and life, and a list of

---

<sup>2</sup> When referring to information from Table 1, “waste received” refers to information from the first column, and “waste managed” refers to information from the remaining columns on Form DEQ 50-25 except “mined materials” or as noted. The amount of waste “received” for each type of waste may not match the sum of the reported amounts identified for each method of waste management. This reflects information as submitted by facilities in the reporting tables. In particular, incinerators may properly include the ash that they generate as waste that is “sent offsite,” and not include it as waste that is “received” at that facility.

<sup>3</sup> Some columns and rows found in Table 1 do not appear in some of these tables. Rows and columns that do not have reported data were not used by any of the reporting entities; *i.e.* MSW Landfills do not incinerate waste so the column is not included; MSW landfills do not accept regulated medical waste so the row is not included.

submitting facilities are in Tables 4, 6, and 8.<sup>4</sup> The calculated statewide remaining years of landfill capacity do not account for regional variations, population changes, changes in waste generation, or the future closing of disposal units. Also, calculations do not include facilities that have not been built and are not accepting waste for which permits may have been issued.

Figure 1 compares the total amount of waste received from 2013 through 2021 at facilities from Virginia and out-of-state jurisdictions. Figure 2 compares municipal solid waste received from 2013 through 2021 from Virginia and out-of-state sources.

## **V. Reports of Economic Benefits**

At the option of the facility owner, Virginia Code § 10.1-1413.1 provides that the data collected may include an accounting of the facility's economic benefits to the locality where the facility is located. This may include the value of disposal and recycling facilities provided to the locality at no cost or reduced cost, direct employment associated with the facility, and other economic benefits resulting from the facility during the preceding calendar year. No facilities provided such information for 2021.

## **VI. Waste Diversion and Recycling**

SWIA data is collected from solid waste permitted facilities. Facilities submit the total tonnage received and how the amounts were managed (landfilled, mined, recycled onsite, recycled offsite, mulched, incinerated, other, composted, or stored). Permitted solid waste management facilities reported that 8.24% (1,526,731.69 tons) of the total waste they managed was diverted from disposal by recycling or mulching. Facilities composted 1.05% (195,101.20 tons) of the total waste managed. Table 20 shows for each SWIA category of waste the total amount of Virginia and out-of-state waste managed, total amount diverted and how the material was managed. In addition, Tables 3, 5, 7, 9, 11, 13, and 15 show how the various facility types managed the waste types.

Most recycling occurs at facilities other than permitted waste management facilities. Local governments provide more complete information on the recycling of waste generated in Virginia. For more detailed information about recycling rates in Virginia see Calendar Year 2020 Virginia Annual Recycling Rate Report: <https://www.deq.virginia.gov/our-programs/land-waste/recycling/recycling-data>. The annual recycling report for calendar year 2021 will be issued later this year.

---

<sup>4</sup> Facilities report available capacity in cubic yards. The available capacity is estimated using the following conversion factors: 1,000 lbs. of MSW = 1 cu. yd.; 1,200 lbs. of CDD waste = 1 cu. yd.; and 1,000 lbs. of industrial waste = 1 cu. yd. The available capacity for individual facilities may vary, depending on factors such as a facility's compaction rate and use of daily cover materials.

**Table 1 – Solid Waste Managed in Virginia for All Reporting Facilities in Tons – 2021**

Waste Type	Total Waste Received <sup>5</sup>	Mined Materials	Landfilled Onsite	Recycled Onsite <sup>6</sup>	Composted Onsite	Incinerated Onsite	Mulched Onsite	Other Onsite <sup>7</sup>	Recycled Offsite	Treated, Stored, Disposed Offsite	Stored Onsite at Beginning of Year	Stored Onsite at End of Year

Friable Asbestos	27,957.51	0.00	27,947.45	0.00	0.00	0.00	0.00	0.00	0.00	10.06	0.00	0.00
White Goods	27,756.03	0.00	0.00	186.00	0.00	0.00	0.00	0.00	25,554.36	2,467.73	499.12	47.06
Regulated Medical Waste	11,013.81	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	11,011.81	0.00	2.00
<b>Total for 2021</b>	<b>22,730,851.70</b>	<b>9,674.75</b>	<b>13,564,997.46</b>	<b>444,526.46</b>	<b>195,101.20</b>	<b>2,188,863.93</b>	<b>238,971.16</b>	<b>360,193.24</b>	<b>843,234.07</b>	<b>5,557,226.59</b>	<b>744,067.47</b>	<b>698,818.47</b>
Total for 2020	22,505,326.75	180,253.34	13,668,094.82	491,938.98	207,332.88	2,236,485.71	299,253.64	350,906.56	846,322.52	5,267,183.96	868,110.10	782,471.96

<sup>5</sup> The amount of “Total Waste Received” and “Stored Onsite at Beginning of Year” may not precisely match the sum of the reported amounts for the remaining columns (i.e., each method of managing the waste). This difference reflects information submitted in the reporting tables. In particular, incineration ash generated by an energy recovery facility or incinerator may be listed as “sent offsite to be treated, stored, or disposed” even though it was not received as ash at that facility. The total waste managed may be greater than the waste received due to ash generated at a facility. Vegetative/Yard Waste may be composted to produce a product that is not managed as a waste.

<sup>6</sup> The majority of recycling takes place at facilities that do not require a permit from the Department and were not required to submit data for this report. Therefore, the amounts shown in this column represent a substantial underestimate of the true recycling rate in the Commonwealth. Table 20 provides more information. The annual recycling rate report for calendar year 2021 will be issued later this year.

<sup>7</sup> “Other Onsite” methods of management may include steam sterilization of medical waste, approved use of shredded tires, and thermal treatment of petroleum contaminated soils, among others.

**Table 18 – Methods of Solid Waste Management (in Tons) – 2021**

Methods of Solid Waste Management	2021 Tons	Percentage
Landfilled Onsite	13,564,997.46	73.19%
Incinerated Onsite	2,188,863.93	11.81%
Sent Offsite to be Recycled	843,234.07	4.55%
Stored Onsite End of Year	698,818.47	3.77%
Recycled Onsite	444,526.46	2.40%
Other Onsite	360,193.24	1.94%
Mulched Onsite	238,971.16	1.29%
Composted Onsite	195,101.20	1.05%
<b>Total</b>	<b>18,534,705.99</b>	<b>100.00%</b>

**Note:** The basis for determining these percentages is the sum for all methods of waste management (recycled, composted, landfilled, etc.) in Table 1, with the exception of: (1) waste stored onsite at the beginning of the year (which is similar to waste received) and (2) waste that was sent offsite for treatment, storage or disposal (i.e., waste that was simply transferred to another facility for ultimate management). Accounting for those two exceptions, the basis for these percentages is 18,534,705.99 tons. Facilities that mine landfill materials report how much material was mined and how it was managed.

**Table 19 – Composition of the Solid Waste Stream in Tons – 2021**

Waste Type	2021 Tons	Percentage
Municipal Solid Waste	14,795,345.45	65.09%

## Attachment 1 – SWIA Reporting Table (Form DEQ 50-25)

### SOLID WASTE INFORMATION AND ASSESSMENT PROGRAM REPORTING TABLE - FORM DEQ 50-25 (Revised 12/17/2018)

1	Facility Name				
2	Permit Number	3 Date Submitted to DEQ		4 Annual Reporting Period	
5	Preparer's First Name	Middle Initial	Last Name		6 Telephone
7	Preparer's E-mail Address				
Has there been a change to the Annual Fee Billing Contact, Address or Telephone Number? <input type="checkbox"/> Yes <input type="checkbox"/> No					
8	Contact First Name		Last Name		Contact Phone
	Address			E-Mail	
	City		State	Zip Code	
9A and 9B Landfills only		9A	Remaining Permitted Capacity Cubic Yards		9B Expected Remaining Permitted Life Years
10	Does facility use active scales? <input type="checkbox"/> Yes or <input type="checkbox"/> No			Landfills not using active scales - enter the total amount landfilled in cubic yards (sum of all jurisdictions)	
11	Originating Jurisdiction			11A Statement of Economic Benefits submitted? <input type="checkbox"/> Yes or <input type="checkbox"/> No	
12	Facilities landfilling VA incineration ash		Use the supplemental form to provide the facility from which ash was received and the amount.		

**Waste amounts measured in :  Tons or  Cubic Yards**

Waste Type	Total Amount of Waste Received (a)	Mined Materials (b)	On-site Management of Waste						Sent Off-site to be: (i)		Stored On-site (j)	
			Landfilled (c)	Recycled (d)	Composted (e)	Incinerated (f)	Mulched (g)	Other (h)	Recycled	Treated, Stored, Disposed	Beginning of Reporting Period	End of Reporting Period
13	Municipal Solid Waste											
14	Construction/ Demolition/Debris											
15	Industrial Waste											
16	Regulated Medical Waste											
17	Vegetative/Yard Waste											
18	Incineration Ash											
19	Sludge											
20	Tires											
21	White Goods											
22	Friable Asbestos											
23	Petroleum Contaminated Soil											
24	Other Wastes (specify)											
25	Total											

**Facility Comments**

Complete a separate form for each jurisdiction.  
See the instructions for completing Form DEQ 50-25. A separate form is provided for the optional Statement of Economic Benefits.

**SUPPLEMENTAL SOLID WASTE INFORMATION AND ASSESSMENT PROGRAM REPORTING TABLE - FORM DEQ 50-25**

**Only those facilities that landfill Virginia incineration ash provide this information.**

Permit Number	Annual Reporting Period
Facilities landfilling VA incineration ash: Received from Permit No., Facility Name	VA ash amount measured in
	<input type="checkbox"/> <b>Tons</b> <input type="checkbox"/> <b>Cubic Yards</b>

**Facility Comments**

<p>Facilities should use the same units of measure (Cubic Yards or Tons) for Rows 12 - 24.          Facilities that do not landfill VA incineration ash do not complete this supplemental form.          See the instructions for completing Form DEQ 50-25.</p>
