

Agenda for Mine Run, Mountain Run, and Lower Rapidan River Clean Up Plan Public Meeting

1. Introductions
 - a. Name, organization (if applicable), and your interest in attending
2. Discuss purpose and objectives of this meeting
 - a. Too much bacteria (E. coli) in the watershed
 - b. To understand the clean up plan (aka Implementation Plan) project area and environmental concerns with the surface water
 - c. Discuss the process and schedule for cleanup plan development
3. Overview of Virginia's Water Quality Process at the Dept of Environmental Quality (DEQ)
4. Background on Implementation Plan requirements and 319(h) Funding
5. Background on Total Maximum Daily Loads (TMDL)
6. Discuss bacteria impairment location in the watershed
7. Discuss locations of DEQ water quality monitoring stations on the impaired streams
8. Discuss land use data in the watershed
9. Overview of potential bacteria sources
10. Review the bacteria source assessment data from the original TMDLs that serve as the basis for this implementation plan development
11. Review the bacteria load reductions that resulted from the original TMDL studies
12. Discuss details of an implementation plan and what to expect throughout the development process and with public participation
13. Provide examples of agricultural, residential, and pet waste and stormwater control measures
14. Discuss in more detail what public participation will look like throughout the development process
15. Talk through next steps and potential project timeline
16. End of presentation
 - a. We are open to any questions and can review previous slides
