

Initial Public Meeting Minutes - TMDL Development for Greendale Creek and Unnamed Tributary to Fleenor Branch

Virginia DEQ Southwest Regional Office

Meeting Location: Greendale Elementary School, Washington County, VA

April 2, 2024 at 6:00pm

- Southwest Virginia Regional TMDL coordinator Landon Jenkins introduced himself and his colleagues.
- He began his presentation and introduced both impaired stream segments discussing their location and drainage acreage including their probable stressors and how DEQ came to this conclusion.
- He opened the floor to questions. Holston River Soil and Water Conservation District representatives asked about if there were any noted problem areas that would contribute sediment to these streams. They also noted this would be a tough TMDL because the impaired areas are so small.
- We discussed if there was a need for a TAC but it was decided there was not.
- Landon said a Community Engagement Meeting would follow
- The meeting ended
